### New faceplate case by VOLTE-TEL

**Modern and elegant design. Smooth touch and bright colors.**

The new 2 in 1 faceplate, introduced by VOLTE-TEL, is both case and holder stand for your iPhone. You can place a 0,10€ coin or anything with the same width in one of the “cuts” at the back of the case and create a vertical or horizontal holder stand any time you need it, perfect for watching videos.
