

BANKNOTE DETECTOR & COUNTER VOLTE-TEL VT-82

The new **VT-82** Banknote Detector and Counter by **VOLTE-TEL** is reliable, accurate and counts your banknotes at high speed whilst giving you that extra security of **counterfeit detection**.

It is ideal for counting even **up to 20.000 notes per day** and is capable of **counting mixed denominations** and counterfeit detection within the same bundle of notes and will **report the value and quantity of each denomination counted**.

The **VOLTE-TEL VT-82** has four levels of counterfeit detection whilst maintaining a counting speed of **1.000 notes per minute**.

4 Detection Types:

1. UV-Ultra Violet Detection.
2. MG-Magnetic Detection.
3. MT-Magnetic Tape Detection.
4. IR-Infra Red Detection.

On detection of a counterfeit/forged note or miscount, the **VOLTE-TEL VT-82 auto stop** facility and error coding will advise the operator.
