

TEMPERED GLASS SCREEN PROTECTORS FOR TABLETS

New **TEMPERED GLASS FULL COVER SCREEN PROTECTOR** by **VOLTE-TEL** with a thickness of only 0.26mm or 0.30mm does not add any burden to your tablet and does not change the texture of the screen. However, it protects the screen even from hard scratches and hits. New **TEMPERED GLASS FULL COVER SCREEN PROTECTOR** is special as it covers completely the tablet's screen, offers great clarity and does not change at all the contrast, brightness and color of the screen. It has a **high degree of hardness of 9H** and is therefore very difficult to break or even scratch, particularly in relation to simple screen protectors.

It is made **with high precision 2.5D rounded edges** for greater safety and avoidance of injuries and if it breaks in case of a very strong hit, it gets very small pieces but not scattered, just like the windshield of the car, so there is no risk of user injuries or screen scratches. Finally, due to the construction material, **you get rid of the unsightly blisters** that can be easily created by using the simple screen protectors, as it fits neatly and easily on your smartphone screen.

The package includes:

- 1 Tempered Glass Full Cover Screen Protector
- 1 cleansing wipe with Alcohol
- 1 cleaning cloth
- Instructions for use
