

USB CHARGING-DATA MAGNETIC BRAIDED CABLE 2.1A 1m ALUMINIUM VCD07 VOLTE-TEL

New **USB cables from VOLTE-TEL** have innovative **magnetic design and detachable charging socket**, in order to remain permanently attached to the device. They are ideal for charging all your devices with **micro USB, type C and Lightning connectors**. They support **quick charge and data transfer to 2,1A** and they are ideal for preventing damage to the charging port of your device, as you can have the connector continuously positioned on the device and adjust only the cable, when needed. In this way, the charging port isn't in danger of damage and additionally the charging connector **protects** the charging port **from the dust**. As long as you have the connector always attached to the device, it is very easy to adjust the cable, even when you are driving.

The great magnet offers direct connection and charging begins automatically as soon as the cable is connected to the contact and the **LED indicator** informs you of the power supply, as it **turns blue** when the device is **charging** and **green** when the **charging is complete**. Also this powerful magnet ensures that the cable won't be detached during charging or transferring your data, since **it can lift the weight of an iPad 9.7" without being disconnected**. Finally, the cable is made of **nylon braided yarns** and the **casing from aluminum**, features that make it **extremely resistant** to the wear of daily use. **It doesn't get tangled or crumpled and it doesn't break**, like other common cables and remains intact after many uses. Using the appropriate charging contact is compatible for use with devices **iOS 11.2.5** and **iTunes 12.7.2.60**. It is available in **5 colors Black, Silver, Red, Gold & Rose Gold** to choose what suits you.
