

NSP--102L with **10000mAh battery** and **2 USB ports** with 1000mAh and 2100mAh output power, can charge 2 devices at the same time. On the built-in USB ports you can charge any 5V device that charges with a USB cable, by connecting the corresponding cable. With the NSP-102L, you won't have to worry about running out of battery. Featuring sleek modern design, made from **high quality plastic with a leather face**, and available in 5 colors, black, white, blue, pink, and red to choose from, the new NSP-102L will become your favorite gadget. **It is quite small only 13x6x1cm in size**, and will take up no space in your bag, and is discreet at all times to carry it with you.

Pressing the **On / Off** button activates the **built-in LCD display** and you can see the percentage of power remaining to be used in the power bank, as well as a **power indicator**, according to the port used when charging a device, ie if you are using the port with a **1000mAh** output the **5.0V 1.0A** light will be displayed and if you use the **2100 mAh** output port the **5.0V 2.1A** light will appear. Finally, the package includes a **micro USB cable**, which is compatible with most of the smartphones and tablets on the market. It is suitable for both Apple devices by adapting the appropriate cable, but also for **Type C** devices, with the addition of the NSP micro USB to **Type C** adapter.
