

PRIVACY ANTI-SPY
3D SEMI CURVED EDGE GLUE TEMPERED GLASS

Privacy is the human nature, however your smartphone could expose **sensitive information** when used in public. People around you **tend to glare** at your smartphone intentionally or not.

With the new revolutionary screen protector **PRIVACY ANTI-SPY 3D SEMI CURVED EDGE GLUE** from **IDOL 1991** and **VOLTE-TEL**, you can protect your smartphone from prying eyes by **restricting the view angle so the screen can be visible only from you**. This is achieved with the new **microlouvre technology** that **darkens the phone screen over a 35° viewing angle** without any blurring or distortion. With just **0.30mm thickness**, it has **high precision curved edges** for maximum safety.

The specific Tempered Glass is designed to be **compatible with raised edge cases** to maximize screen protection, it has strong glue on the edges (Edge Glue) for easier application and avoidance of air bubbles that is easier to form when using a common full glue tempered glass. It has **high hardness durability 9H** that makes it hard to scratch or break. Even in the case that it breaks, it becomes many **little pieces that stay together** so it eliminates any danger of user injury or screen damage.
